Press Release

Top Safety Accreditation for **COMPRESSOR SOLUTIONS LTD**

Local business Compressor Solutions Ltd has been awarded accreditation from Safecontractor and Constructionline for its commitment to achieving excellence in health and safety.

Safecontractor and Constructionline are leading third party accreditation schemes which recognises very high standards in health and safety management amongst UK contractors.

Employing 4 people, Compressor Solutions Ltd is principally involved throughout all sectors, specialising in the supply, service and repairs and installation of all compressed air equipment into all industries and specialising in **Oil Free Compressed Air** within the medical and pharmaceutical industries. Compressor Solutions Ltd.'s most recent clients have included major players such as Aberystwyth University, Swansea and Vale NHS Trust, Hywel Dda NHS Health Trust, Aneurin Bevan Health Board, NPT Council, RCT Council, Olympus Medical Instruments.

The company's application for Safecontractor and Constructionline accreditation was driven by the need for a uniform standard across the business.

The accreditations will enhance the company's ability to attract new contracts and its commitment to safety will be viewed positively by its insurers when the company liability policy is up for renewal.

Safecontractor and Constructionline are applicable to most sectors although it is particularly relevant to food manufacture, property, facilities management, retail and leisure sectors, all of which are big users of contracted services.

John Kinge, technical director of Safecontractor said, "Major organisations simply cannot afford to run the risk of employing contractors who are not able to prove that they have sound health and safety policies in place."

"More companies need to understand the importance of adopting good risk management in the way that Compressor Solutions Ltd has done. The firm's high standard has set an example which hopefully will be followed by other companies within the sector."

Safecontractor and Constructionline play a vital role in supporting our clients in meeting their compliance needs, whilst working with their contractors as they progress through the accreditation process."

Under these schemes, businesses undergo a vetting process which examines health and safety procedures and their track record for safe practice. Those companies meeting the high standard are included on a database, which is accessible to registered users only via a website.

Client-organisations who sign up to the scheme can access the database that enables them to vet potential contractors before they even set foot on site. These clients agree that, as users of the scheme, they will engage only those who have received accreditation.
